

SEARCH ENGINES ARE NOT YOUR CUSTOMERS. PEOPLE ARE.

OPTIMIZE FOR SEARCH ENGINES. CREATE FOR HUMANS.

WHAT SEARCH ENGINES DO

DISCOVERY

Search engines help people
find information.

They connect users with
relevant content.

Their job is to recommend.

VS

WHAT PEOPLE DO

DECISIONS

People decide:

- What to read
- What to trust
- What to share
- What to buy
- Who to follow

Their job is to choose.

SEARCH ENGINES VS PEOPLE

SEARCH ENGINES WANT

- Relevant content
- Clear structure
- Fast pages
- Authority signals
- Helpful answers

PEOPLE WANT

- Solutions
- Clarity
- Trust
- Value
- Results

THE WRONG APPROACH

THE BETTER APPROACH

THE SEO PARADOX

*The more you focus on helping people,
the more search engines want to recommend your content.*

THE PEOPLE-FIRST FORMULA

REMEMBER

Search engines don't
buy your product.

Search engines don't
subscribe to your
newsletter.

Search engines don't
recommend your business
to friends.

PEOPLE DO.

“

*“Search engines may find your content.
People decide its value.”*

”
